Experience

LimeChain: Oct 2025 - Jan 2025

Junior Web3 Developer

- Ethereum Data Fetcher: Built an Etherscan-like platform using NestJS and Vite to index and display Ethereum blocks, transactions, and address data
- Multichain Bridge: Developed a validator-based cross-chain bridge with Solidity, NestJS, and a Next.js UI to enable secure asset transfers across multiple networks

Telebid Pro: July 2024 - Sep 2025

Junior Backend Developer (Started as Trainee, promoted to Junior Developer)

- Optimized complex SQL queries in PostgreSQL to improve performance and reduce response times
- Developed backend integrations with third-party platforms including PayPal and Firebase
- Designed and implemented a custom protocol using WebSockets to replace traditional HTTP request/response, significantly reducing header overhead and improving efficiency for clients on slow connections
- Created a reporting module to generate and deliver analytical insights based on application data
- Participated in code and specification reviews to ensure quality and alignment with project goals

Education

SoftUni 2017-2022
